

# SFlow 200

## SURFACE PUMP

### HIGH LIFT / LONG DISTANCE

The **SFlow 200** is an easy to maintain pump that does not require any special training.

It starts to transport water, with less energy than all other pumps, in very cheap pipes over long distances with high elevations (max 150 meters).

It provides water under high pressure regardless of the sunshine, whether for irrigation, water raising, drip irrigation, or valorization of small remote springs of isolated houses or small communities.

Its small size and light weight are an advantage because it is easily movable.

# SFlow 200

Dimensions : **550x230x185 mm**  
 Weight : **12 kg**  
 Input voltage : **~36-50V DC**  
 Max. current : **5 A**  
 Max. flow rate : **200 l/h**  
 Max. suction lift : **4 m**  
 Max. vertical lift : **150 m**
